DETAILED ACTION

Notice of Amendment

1. In response to the amendment filed on 6/21/2007, amended claim(s) 1, 6, 8, 11, 16, 18, and 21-26, withdrawn claim(s) 2-5, 7, 9, 10, 12-15, 17, 19, and 20, and new claim(s) 27-29 is/are acknowledged. The current rejections of the claim(s) 1, 6, 8, 11, 16, 18, and 21-26 is/are *withdrawn*. The following new and reiterated grounds of rejection are set forth:

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 6, 8, 11, 16, and 18, drawn to a pressure measuring apparatus, classified in class 600, subclass 587.
 - II. Claims 21-29, drawn to a process for measuring and monitoring the amount of pressure exerted between anatomical structure, classified in class 600, subclass 587.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case at least the apparatus as claimed can be used to practice another and materially different process including measuring the compressive force between anatomical structures external to a bodily lumen, including for example: the

strength of a user's grip and/or the strength of a user's thigh muscles via compression

Page 3

therebetween.

4. Because these inventions are independent or distinct for the reasons given

above and there would be a serious burden on the examiner if restriction is not required

because the inventions require a different field of search (see MPEP § 808.02),

restriction for examination purposes as indicated is proper.

5. Because these inventions are independent or distinct for the reasons given

above and there would be a serious burden on the examiner if restriction is not required

because the inventions have acquired a separate status in the art due to their

recognized divergent subject matter, restriction for examination purposes as indicated is

proper.

Election/Restrictions

6. This application contains claims directed to the following patentably distinct species:

- Species B: "compressive foam" embodiment drawn to Figures 3A and 3B, and
- Species C: "air or fluid filled balloon" embodiment drawn to claims 27-29 and paragraphs 14 and 30 of the Specification.
- 7. The species are independent or distinct because they are substantially dissimilar and structurally divergent means for measuring pressure applied by an anatomical structure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 11, and 21-26 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

8. A telephone call was made to Matthew Newboles on 08/27/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey G. Hoekstra whose telephone number is (571) 272-7232. The examiner can normally be reached on Monday through Friday 8am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
